This series offers an outlet for research in the history of economic thought. It features scholarly studies on important theoretical developments and great economic thinkers that have contributed to the evolution of the economic discipline.

Springer Studies in the History of Economic Thought (SSHET) welcomes proposals for research monographs, edited volumes, textbooks and handbooks from a variety of disciplines that seek to study the history of economic thinking and help to arrive at a better understanding of modern economics. Relevant topics include, but are not limited to, various schools of thought, important pioneers and thinkers, ancient and medieval economic thought, mercantilism, cameralism and physiocracy, classical and neoclassical economics, historical, institutional and evolutionary economics, socialism and Marxism, Keynesian, Sraffian and Austrian economics, econometrics and mathematical studies as well as economic methodology and the link between economic history and history of economic thought.

All titles in this series are peer-reviewed.

For further information on the series and to submit a proposal for consideration, please contact Johannes Glaeser (Executive Editor Economics) Johannes.glaeser@springer.com.

Acknowledgments

The present volume constitutes a revised and enlarged version of my “L’incertezza in economia. Una storia delle teorie da Keynes ai giorni nostri,” published in Italian in 2024. It concerns topics that have constituted the focus of my research for many years. My first thanks, therefore, are due to my colleagues who were co-authors of some of the research that provided the inspiration for this study: Marcello Basili, Alberto Feduzi and Jochen Runde. I must also thank some colleagues who have frequently read my previous work and who were gracious enough on this occasion to read and comment on the entire manuscript in its earlier Italian version: Jack Birner, Massimo Di Matteo, Nicola Giocoli, Mario Pomini, Enrico Petracca and Roberto Romani. Other colleagues provided equally valuable feedback on specific chapters: Valentina Erasmo, Luca Fiorito and Ivan Moscati. The comments made by Anna Carabelli, Giacomo de Gioia, Alessandro Innocenti, Cosimo Perrotta and Salvatore Rizzello after the publication of the Italian version proved to be of great help in the process of drafting this new version, which also benefited in its final revision from the kind comments of George Bent, Mauro Caminati, John Davis, Andrew Freeman and Itzhak Gilboa.

Writing a book absorbs much of the author’s energy and attention for a period of time, so the support of those close to you is particularly important. The support that I have received from my wife Patrizia Lattarulo and our children Antonella, Daniele and Francesco has been paramount. But equally important over the years has been the kindness shown to me, first in a face-to-face meeting in Siena in 2005, and then in a series of subsequent email exchanges, by Daniel Ellsberg, a scholar whose role is crucial to the story told here, but also a true hero of post-World War II American history, who recently passed away. This book is dedicated to his memory.
