

POSTER SESSIONS

Poster Session 1 (uneven poster numbers)

Saturday, Sept. 15, 2012 (16:00-18:00)

Poster Session 2 (even poster numbers)

Sunday, Sept. 16, 2012 (16:00-18:00)

Abrantes, Julia P-1

miR-34a triggers apoptosis and autophagy of highly aggressive melanoma cells

Acedo, Pilar P-2

Enhanced apoptotic cancer cell death by combining two photoactivable drugs

Ahokas, Kristiina P-3

Apoptosis-specific serum marker M30 in epithelial ovarian cancer

Akinduro, Olufolake P-4

Constitutive autophagy as a terminal differentiation mechanism?

Akpinar, Birce P-5

Crosstalk between 5-fluorouracil-induced colon cancer cell death pathways and the significance of p53

Alonso, Covadonga P-6

Cell death, endoplasmic reticulum stress and autophagy tight regulation by a double stranded DNA virus

Antunes, Fernanda P-7

Autophagy in murine melanocytes malignant transformation and its relationship with chemoresistance.

Appelqvist, Hanna P-8

Lysosomal exocytosis and cathepsin-dependent activation of caspase-8 after UVA irritation of human keratinocytes

Aramaki, Yukihiko P-9

Involvement of actin cytoskeleton in macrophage apoptosis induced by cationic liposomes

Arhipova, Elena P-10

Effects of TRAIL in mice with different radiosensitivity during acute γ irradiation

Arsenian Henriksson, Marie P-11

Targeting of MYCN-Max signaling with a small molecule induces apoptosis and TrkA-mediated differentiation in human neuroblastoma

Azijli, Kaamar P-12

MAPK p38 and JNK have opposing activities on TRAIL-induced apoptosis activation that is mediated by Mcl-1 in NSCLC cells.

Bae, Kwang Hee P-13

Glyceraldehyde-3-phosphate, a glycolytic intermediate, plays a key role in controlling cell fate via inhibition of caspase activity

Bagheri, Fatemeh P-14

Killing effects of siRNA/doxorubicin cocktail on T-47D breast cancer cell line occur via DFF-45 gene silencing and apoptosis induction

Bantel, Heike P-15

Increased Apoptosis Induction in Hepatocellular Carcinoma by Novel Tumor-Targeted TRAIL Fusion Protein in Combination with Bortezomib

Basit, Farhan P-16

RIP1-dependent assembly of a cell death signaling complex is required for IAP inhibitor-mediated sensitization for TRAIL-induced apoptosis.

Baud, Veronique P-17

RelB Ser472 phosphorylation by IKK is essential for selective RelB transcriptional activation downstream of TNF receptors

Bazyka, Dimitry P-18

Ineffective apoptosis and stem cell differentiation in radiation-induced cognitive dysfunction

Bechara, Alexandre P-19

Apoptosis and autophagy in resistant osteosarcoma cells exposed to a new palladacycle compound

Becher, Juliane P-20

Ambra1 in death and survival of regulatory T cells

Bellot, Gregory P-21

PPAR γ activation is implicated in the anti-cancer activity of the synthetic compound Pr-MPO

Bergmann, Michael P-22

Interleukin-24 and toll-like-receptor 3 activation synergize to induce apoptosis in tumor cells

Bertaglia, Enrico P-23

Role of p53 in Muscle Atrophy

Bertrand, Mathieu P-24

RIP3 contributes to RIP1-kinase dependent apoptosis independently of its kinase activity

Bonaldo, Paolo P-25

Apoptosis and autophagy are affected in primary neural cell cultures lacking collagen VI

Bras, Marlene P-26

NK-pDC crosstalk in the context of HIV-1 infection: a double-edged dialogue implicating HMGB1.

Bujokova, Barbora P-27

Platinum drug-mediated activation of MAPK pathways is essential for enhancement of TRAIL-induced apoptosis in human colon cancer cells

Buqué, Aitziber P-28

p53 status could determine antifolate-induced tumoral cell death.

Buttarelli, Marianna P-29

Role of estrogens in MDM4 mediated- p53 dependent apoptosis

Campanella, Michelangelo P-30

IF1 protects from apoptosis inhibiting Drp1 mediated remodelling of mitochondria

Capitani, Nagaja P-31

Regulation of lymphocyte trafficking by p66Shc: novel insights into CLL B cell survival

Castagnaro, Silvia P-32

Extracellular collagen VI modulates autophagy and apoptosis in mouse embryonic fibroblasts

Cerella, Claudia P-33

ROS-independent JNK activation and BCL-2 multi-site phosphorylation link mitotic arrest to apoptosis induced by garlic-derived compounds

Chandra, Dhyan P-34

E2F1-mediated upregulation of Bim, a BH3-only protein, functions as a prosurvival protein in cancer

Charles, Emilie P-35

Apoptotic signalling activated by the fluoxetine antidepressant

Chikh, Anissa P-36

iASPP a novel autophagy inhibitor in keratinocytes

Chipuk, Jerry P-37

Cellular addiction to oncogenic signaling suppresses mitochondrial function

Chrisam, Martina P-38

Pharmacological reactivation of autophagy ameliorates the dystrophic phenotype of Col6a1 null mice.

Cillessen, Saskia P-39

MCL1 is involved in apoptosis-resistance in diffuse large B-cell lymphoma by inhibition of Bak

Condorelli, Gerolama P-40

Chaperone-mediated autophagy regulates the levels of the anti-apoptotic protein PED in non small cell lung cancer

Corazzari, Marco P-41

Proteolysis of Ambra1 during apoptosis has a role in the inhibition of the autophagic pro-survival response

Cornmark, Louise P-42

The PKC activator TPA and the Smac mimetic LBW242 together induces cell death in basal-like breast cancer cell lines

Cottet, Sandra P-43

Cytoprotective action of α -crystallins against Bax-dependent apoptosis of photoreceptor cells

Culmsee, Carsten P-44

CYLD mediates necroptotic cell death induced by oxidative stress

D'Eletto, Manuela P-45

The involvement of Transglutaminase 2 in the autophagy-dependent clearance of ubiquitinated proteins

de Poot, Stefanie P-46

Cytotoxic lymphocyte protease granzyme M targets the mitochondria in a caspase-independent manner

De Zen, Federica P-47

Nec-1-mediated protection from RIPK1-independent necroptosis depends on the presence of RIPK1

De Zio, Daniela P-48

Unravelling the mechanism of Ku-mediated regulation of Apaf1 in neural differentiation

Delmas, Elisabeth P-49

FGF1 phosphorylation inhibits its anti-apoptotic activity in PC12 cells.

Di Bartolomeo, Sabrina P-50

Analysis of Ambra1 post-translational modifications during cell cycle progression

Di Benedetto, Mélanie P-51

Involvement of the survival factor AAC-11 in MDA-MB-231 aggressiveness

Dini, Luciana P-52

Smart "dual-function" molecule exploitable to maximize therapeutic efficacy of cancer PhotoDynamic Therapy

Doulazmi, Mohamed P-53

Genomic wide profiling of cerebellar cortex during postnatal development: pattern of expression of cell death genes

Dudek, Aleksandra P-54

Effects of chemotherapeutics on the immunogenicity of melanoma cell death

Dunai, Zsuzsanna P-55

Activation of either the intrinsic or the extrinsic pathways of apoptosis resulted in necroptotic cell death under caspase-compromised conditions in U937 cells

Enwere, Emeka P-56

TWEAK and cIAP1 regulate myoblast fusion through the non-canonical NF- κ B signaling pathway

Erustes, Adolfo P-57

Effects of overexpression of α -synuclein in apoptosis cell death in immortalized astrocytes.

Ewald, Frida P-58

Murine c-FLIP-R – a modulator of cell death in the immune system

Fecker, Lothar Friedrich P-59

Induction of apoptosis by the nonsteroidal anti-inflammatory drug (NSAID) diclofenac/HA is based on activation of intrinsic pathways and related to Bad upregulation as well as Mcl-1 and Bcl-w downregulation

Fiore, Danilo P-60

Impact of high loading dose of atorvastatin in contrast-induced acute kidney injury

Fiorenza, Maria Teresa P-61

The tumor suppressor TSC22D4 and AIF associate in mitochondria and shift to different nuclear compartments at the onset of apoptosis

Fiorito, Filomena P-62

Induction of both autophagy and apoptosis by Bovine herpesvirus-1 in mouse neuroblastoma (neuro-2a) cells

Fischer-Posovszky, Pamela P-63

TRAIL (TNF Related Apoptosis Inducing Ligand) Regulates Human Adipocyte Metabolism by Caspase-mediated Cleavage of PPAR γ

Formichi, Patrizia P-64

Effects of cerebrolysin administration on oxidative stress-induced apoptosis in lymphocytes from CADASIL patients

Forrester, Alison P-65

TCDD induced autophagy in the epidermal equivalent model in relation to the human toxicity, chloracne

Fuentes, Jose M P-66

The LRRK2 G2019S mutant exacerbates basal autophagy through activation of the MEK/ERK pathway

Galkin, Ivan P-67

Mitochondria-targeted compounds and endothelium activation

Gatliff, Jemma P-68

The anti-apoptotic protein TSPO limits mitophagy altering mitochondrial function: 18kDa to block essential ubiquitination

Giambruno, Roberto P-69

FABLE regulates c-ABL activity in response to genotoxic stress

Giammarioli, Anna Maria P-70

The glycolysis inhibitor 2-Deoxy-D-glucose exerts a cyto-protective autophagic flux conferring apoptotic resistance to metastatic melanoma cells.

Gogvadze, Vladimir P-71

Modulation of cell death by mitochondrial substrates

Grasso, Silvina P-72

Pharmacological modulation of autophagy enhances AZD-6244 antitumor effect in colorectal cancer cells.

Grumati, Paolo P-73

Autophagy and Apoptosis Thwarts Collagen VI Muscle Diseases

Hewitt, Sarah P-74

Stress-mediated mitochondrial response of DJ-1 and Parkin

Hijmering, Nathalie P-75

hsTRAIL/Apo2L induces apoptosis in a subset of chemotherapy-resistant Anaplastic Large Cell Lymphoma cells

Hirchaud, Fabienne P-76

Isoliquiritigenin has potent anti-tumor activities in human cervical carcinoma cell lines.

Hong, Jiann P-77

The role of the β nodavirus-induced oxidative stress signaling on host cellular autophagy, necrotic cell death and viral replication in fish cells

Imreh, Gabriela P-78

Chromosomal breaks during mitotic catastrophe trigger γ H2AX-ATM-p53-mediated apoptosis.

Ivin, Yurii P-79

Control of death development in encephalomyocarditis virus-infected HeLa cells

Jacquín, Marie P-80

Escape from Caspase-Independent Cell Death requires GAPDH-dependent activation of the AKT pathway leading to Bcl-xL overexpression

Jelinkova, Iva P-81

Platinum(IV) complex LA-12 mediates effective enhancement of TRAIL-induced apoptosis by stimulation of mitochondrial engagement in colon cancer cells

Jemaà, Mohamed P-82

Selective killing of p53-deficient cancer cells by SP600125

Kaiser, William P-83

Toll-like Receptor 3 induces RIP1-independent necrosis via a TRIF-RIP3 complex

Karoly Kristof, Endre P-84

Novel role of ICAM3 and LFA-1 in the interaction between human macrophages and apoptotic neutrophil granulocytes

Khacho, Mireille P-85

AIF promotes cell survival by modulating mitochondrial structure and function

Kharaziha, Pedram P-86

Targeting of distinct signaling cascades and cancer associated fibroblasts define the efficacy of Sorafenib against prostate cancer cells

Kim, Eun Young P-87

Proteomic analysis of oxidative stress-induced neuronal cell death

Kim, Nam Deuk P-88

Novel dihydrobenzofuro[4,5-b][1,8] naphthyridin-6-one derivative, MHY-449, induced apoptotic cell death through modulation of the cell cycle in HCT116 human colon cancer cells

Kirshenbaum, Lorrie P-89

Cross-Talk Between Mitochondrial and ER Death Pathways in the Heart

Koval, Olga P-90

Apoptosis, anoikis and tumor cell death induced by antitumor peptide lactaptin

Krestnikova, Natalija P-91

Muscle-derived cell lines multipotency and sensitivity to apoptotic stimuli

Kruyt, Frank P-92

Kinome profiling reveals novel TRAIL-induced signaling routes responsible for invasion stimulatory effects in resistant non-small cell lung cancer cells

Kulik, George P-93

Emotional Stress Inhibits Apoptosis and Accelerates Prostate Cancer Development through BAD Phosphorylation

Kulikov, Andrey P-94

Hypoxia stimulates α -tocopheryl succinate, but suppresses doxorubicin-induced cell death.

Kögel, Donat P-95

Therapeutic aspects of isocitrate dehydrogenase 1 (IDH1) mutation in oxidative stress-triggered glioma cell death

Landajuela, Ane P-96

Physical and functional interaction of cardiolipin with BAX/BAK

Landes, Thomas P-97

A new and unexpected function of the antiapoptotic protein Mcl-1

Langone, Francesca P-98

Identification and mapping of phosphatases that modulate autophagy

Le Cloennec, Christophe P-99

The Role of the new c-FLIP binding proteins Ku70 and Rack1 in Death Receptor mediated apoptosis: Rack1 and the DUB Ku70 : Novels regulators of c-FLIP function

Lee, Won Sup P-100

Citrus unshiu Marc. peel Exhibits Apoptotic Effects on U937 Human Leukemic Cells at Least in Part through activation of JNK and p38 MAPK.

Leleu, Nathalie P-101

Mitochondrial localization and functions of the p53 protein in proliferative cells

Liagre, Bertrand P-102

Comparative effects of cyclopamine and jervine on apoptosis induction and COX-2 expression on HEL and TF1a human erythroleukemia cells

Liao, Chunyan P-103

OPA1 is required for correct mitochondrial turnover, distribution and mtDNA maintenance

Linkermann, Andreas P-104

Kidney Tubular Cell Necroptosis is mediated by a FasL-RIPK1-RIPK3-pathway in vivo

Liu, Dan P-105

Autophagy is implicated in the anti-cancer activity of the lanthanide compound Praseodymium Mercaptopyridine Oxide

Lydie, Dubanet P-106

Role of autocrine neurotrophins production in the survival and rituximab apoptotic sensitivity of DLBCL human cell lines.

Maeda, Akihiro P-107

Macrophage uptake of cardiolipin-coated mitochondria

Maes, Hannelore P-108

The autophagy blocker chloroquine promotes tumor vessel normalization by increasing Notch-signaling

Mahdavi, Majid P-109

Down-regulation of survivin concomitant with the activation of Caspase-9 by a derivative from 4-aryl-4H-chromenes family induces apoptosis in K562 leukemia cell line

Maiani, Emiliano P-110

DNA-damage stress response in female germ cells: the emerging role of c-Abl as a regulatory switch

Mancini, Francesca P-111

MDM4 stimulates p53-mediated apoptosis by promoting its transcriptional repression of anti-apoptotic targets

Manov, Irena P-112

Sorafenib suppresses Doxorubicin-triggered autophagy in p53 deficient Hep3B cells via ERK inhibition, cyclin D1 degradation and activation of PI3/Akt.

Marchán, Sandra P-113

Characterization of Apaf-1 inhibition as pharmacological strategy

Marconi, Matteo P-114

lipid rafts as supervisors of cell response to TRAIL

Marfe, Gabriella P-115

Autophagic and apoptotic mechanisms of kaempferol-induced death in K562 cells

Marino-Merlo, Francesca P-116

Mechanisms involved in D(-)lentiginosine-induced apoptosis

Martin, Shaun P-117

Expression of Glucose Regulated Protein 78 effects Fenretinide and Bortezomib induced tumour cell death in vitro.

Martire, Sara P-118

Role of poly(ADP-ribose)polymerase in Amyloid β toxicity and Alzheimer disease

McCormick, Anna P-119

TRAIL resistance in non-transformed cells is controlled at two checkpoints by specificity protein-1 mediated expression of cFLIP and XIAP

McKee, Chris P-120

Cannabinoids hijack the autophagy pathway to promote melanoma cell death

Medvedeva, Yulia P-121

Peculiarities of organism's response to acute γ irradiation in mice of different strains

Mendez Callejas, Gina Marcela P-122

Combretastatin A-4 induce mitochondrial p53-independent apoptosis in non-small cell lung carcinoma cells

Meshkini, Azadeh P-123

Foxo3a targets mitochondria during guanosine 5'-triphosphate guided erythroid differentiation

Mironova, Nadezhda P-124

RNase A strongly decreased metastasizing of Lewis lung carcinoma through the affect of miRNAs regulated tumor development and progression

Momoi, Takashi P-125

The mutated GPRs localized in AUT1 are involved in the pathogenesis of Autism spectrum disorder

Montagna, Costanza P-126

S-nitrosylation is associated with the onset of an ageing-related mitochondrial phenotype in skeletal muscle: possible involvement in cachexia.

Moosavi, Mohammad Amin P-127

Knockdown of Nucleostemin gene expression inhibits proliferation and induces post-G1 arrest apoptosis in human leukemia K562 cells

Moret Tatay, Inés P-128

T-lymphocytes from Crohn's Disease patients are less prone to undergone apoptosis owing to catalase activity inhibition

Morgado, Ana P-129

Apoptosis-associated microRNAs are Altered during Neural Differentiation with no Evidence of Cell Death

Moslehi, Maryam P-130

SK-N-MC cell death is occurred by distinct molecular mechanisms in response to hydrogen peroxide and superoxide anions

Muntané, Jordi P-131

The increased expression of p63/p73 Δ N isoforms, and reduction of CD95 and TRAIL-R1 cell death receptor expression are bad prognosis markers of patients with HCC

Muscolini, Michela P-132

The cancer-associated K351N mutation affects the ubiquitination and the translocation to mitochondria of p53 protein

Nardacci, Roberta P-133

Enhanced autophagy in Long-Term Non-Progressors. A protective mechanism to contain HIV-1 infection?

Norberg, Erik P-134

Metabolic Fingerprints Reveal Novel Targets in Molecular Subsets of Diffuse Large B Cell Lymphoma

Nowikovsky, Karin P-135

P53 and mitochondria-mediated cell death in KP46 anticancer activity

O'Reilly, Paul P-136

Novel ratiometric approach indicates important death receptor-mitochondrion interplay in TRAIL mediated cell death

Oliveira, Sara P-137

Carbon monoxide as an anti-apoptotic agent against perinatal hypoxia: autophagy targeting

Ozturk, Melek P-138

The effects of NAD on apoptosis regulating genes in pancreatic islets cells after STZ administration in newborn rats

Palmeira dos Santos, Caroline P-139

Anti-leukemia effects of cytarabine is potentiated by autophagy inhibitors: relationship with hl 60 cells differentiation.

Panaretakis, Theocharis P-140

Sorafenib, a novel treatment for Multiple Myeloma

Panieri, Emiliano P-141

Crosstalk between calcium and ROS in the adaptive response to oxidative stress in lung cancer cells

Pantic, Boris P-142

DMPK prevents ROS-induced cell death by assembling a HK II-Src complex on mitochondrial surface

Peixoto da Silva, Janaina P-143

Lithium increases tyrosine kinase inhibitors activity: Role of GSK3 Pathways

Pelizzaro-Rocha, Karin P-144

Autophagic cell death of pancreatic cancer cells mediated by Calix[6]arene is not associated to resistance acquisition

Pennati, Marzia P-145

Reconstitution of miR-205 modifies the drug sensitivity profile of prostate cancer cells in vitro and in vivo

Pereira, Clara P-146

Discovery of potent small molecule caspase-7 activators that sensitize tumour cells for etoposide cytotoxicity

Pereira, Gustavo P-147

Regulation and role of NAADP autophagy-induced in astrocytes

Perez-Paya, Enrique P-148

Selective inhibition of the apoptosome-constituent protein Apaf-1 as a potential therapeutic strategy to inhibit unwanted cell death

Perez-Polo, J. Regino P-149

Genotoxic consequences of hypoxia ischemia and oxygen resuscitation in a rat model of perinatal ischemia.

Peschiarioli, Angelo P-150

TAp63-dependent regulation of glutaminase 2 (GLS2) expression

Plötz, Michael P-151

Disruption of the VDAC2–Bak interaction by Bcl-xS mediates efficient induction of apoptosis in melanoma cells

Pourkarimi, Ehsan P-152

New insight into C. elegans apoptosis regulation 'Revisiting an old story'

Pourpirali, Somayeh P-153

Transcriptional regulation of Ambra1 in cell death and survival

Pozzoli, Manuela P-154

Cell response to mutant prion protein misfolding: alterations in secretory transport and possible involvement of autophagy

Puccini, Joey P-155

Defective DNA damage response and genomic instability in caspase-2-deficient cells

Quintavalle, Cristina P-156

MIR-221/222 regulate temozolomide sensitivity in glioma cell lines targeting the DNA Methyltransferase MGMT

Radi, Elena P-157

Cerebrolysin administration reduces oxidative stress-induced apoptosis in lymphocytes from healthy subjectes

Ramirez-Labrada, Ariel P-158

Sorafenib induces apoptosis and autophagy in human myeloma cells.

Ratinaud, Marie-Hélène P-159

Activation of a survival autophagic signalization in response to a moderate oxidative stress in human keratinocytes

Reidy, Mairead P-160

Effect of MLN4924 on TRAIL-induced apoptosis in haematological malignancies

Rekers, Nicole P-161

Targeting of autophagy to improve sensitivity to apoptosis of diffuse large B-cell lymphoma

Renaud, Flore P-162

Anti-apoptotic activity of FGF1 in Neuroblastoma SHSY5Y cells; Paracrine/autocrine and/or intracrine pathways?

Resemann, Henrike P-163

A lesson from mammary gland biology: elucidating the role of cathepsins B and L in non-classical lysosomal-mediated programmed cell death

Rodolfo, Carlo P-164

Role of Transglutaminase 2 in immunogenic and ER-stress-induced cell death in cancer

Rodrigues, Cecilia M.P. P-165

Hepatocyte cell death by deoxycholic acid is mediated by miR-34a regulation of SIRT1 and p53 proteins

Rodrigues, Leticia P-166

Lithium Attenuates Calcium Signaling and Autophagic Impairment in a Rat Model of Sporadic Alzheimer's Disease.

Rogalinska, Malgorzata P-167

A new approach for CLL therapy

Romagnoli, Alessandra P-168

ESX-1 dependent impairment of autophagic flux by Mycobacterium tuberculosis in human dendritic cells

Rousset, Catherine P-169

Is AMP-activated kinase (AMPK) beneficial or detrimental after perinatal HI?

Rožman, Saša P-170

Neutrophil differentiation is regulated by Atg5

Sacco, Francesca P-171

Mapping the human phosphatome on growth pathways

Santin, Giada P-172

Hypocrellin B-Acetate-mediated Photodynamic Activation drives HeLa cells to apoptotic death

Santin, Giada P-173

Long-term exposure of undifferentiated neuroblastoma rat cells (B50) with platinum compounds induces autophagy.

Santini, Simonetta P-174

ATM kinase modulates ITCH E3 ubiquitin ligase activity

Sapozhnikov, Alexander P-175

Involvement of HSP70 in anti-apoptotic effect of chloride channel blockers in model of spontaneous and induced programmed death of EL4 cells in vitro

Saraiva, Lucilia P-176

Discovery of a new inhibitor of p53-MDM2 interaction using a yeast target-based screening strategy

Sarvari, Anitta Kinga P-177

Adipocyte cell death and clearance

Sbarra, Stefania P-178

YM155-mediated inhibition of survivin expression enhances TRAIL-induced apoptosis in human triple-negative breast cancer cells

Schenk, Barbara P-179

Smac mimetic primes FADD- or caspase-8-deficient leukemia cells for TNF α -induced necroptosis and overcomes apoptosis resistance

Sessler, Tamas P-180

Uncoupling of Death Receptor Induced NF- κ B Activation from Apoptosis

Siracusano, Gabriel P-181

Permissiveness of THP-1 monocytic cells to HSV-1 infection: role of the autophagic pathway

Sishi, Balindiwe P-182

Autophagy upregulation promotes survival and mitigates doxorubicin-induced oxidative stress

Skender, Belma P-183

Docosahexaenoic acid-mediated enhancement of TRAIL-induced apoptosis is associated with significant changes of sphingolipid metabolism

Sorokina, Irina P-184

Anti-apoptotic proteins of Bcl-2 family and N-acetyl cysteine do not prevent but delay cell death in HCT116 σ ^{-/-} cells.

Szabo, Ildiko P-185

Induction of Bax/Bak-independent apoptosis in tumor cells by membrane-permeant potassium channel Kv1.3 inhibitors

Szondy, Zsuzsa P-186

Macrophages engulfing apoptotic cells produce retinoids to regulate apoptosis as well as phagocytosis of apoptotic cells in the thymus

Takahashi, Nozomi P-187

Dose-dependent and opposing effects of necrostatin-1 in TNF-induced systemic inflammatory response syndrome (SIRS)

Tezil, Tugsan P-188

The regulation of FOXO3 by IKK- β in apoptosis and autophagy

Thornton, Claire P-189

A cell model for dissecting p53-mediated apoptosis mechanisms in perinatal brain injury

Trapani, Laura P-190

Early autophagy inhibition is required for the completion of Activation-Induced Cell Death (AICD) in T cells

Trauzold, Anna P-191

Nuclear TRAIL death receptors enhance tumor cell proliferation by inhibiting let-7 maturation

Trisciuglio, Daniela P-192

Removal of the BH4 domain from bcl-2 protein triggers an autophagic process which impairs tumor growth

Tylichova, Zuzana P-193

Interaction of butyrate and polyunsaturated fatty acids modulate apoptotic vs. differentiation response of colon epithelial cells

Ullio, Chiara P-194

Sphingosine mediates TNF toxicity through lysosomal membrane permeabilization in hepatoma cells

van Loo, Geert P-195

The NF- κ B regulatory protein A20/TNFAIP3 controls intestinal homeostasis and inflammation

Vanden Berghe, Tom P-196

Intestinal goblet cell hyperplasia, key to survive sepsis?

Velasco Díez, Guillermo P-197

Changes on the sphingolipid composition of the endoplasmic reticulum determine the cell death-promoting effect of autophagy stimulation by THC

Ventura, Natascia P-198

Mitochondria respiratory chain dysfunction controls Caenorhabditis elegans aging via p53 and Hif-1 induction of autophagy

Verdier, Mireille P-199

Inactive p53 induced autophagy in CoCl₂ stressed neuroblastoma cell line whereas lack of p53 failed

Vescovo, Tiziana P-200

Ambra1 regulates the late stages of autophagy by modulating the activity of the lysosomal protein Spinster-1

Vesela, Barbora P-201

Caspase-7 in tooth germ and hair follicle development and maintenance

Voracova, Katerina P-202

Induction of apoptosis in cancer cell lines by cyanobacterial metabolites

Wachter, Franziska P-203

TRAIL induces apoptosis preferentially in resting tumor cells

Wei, Taotao P-204

Phosphatidic acid mediates the targeting of tBid to induce lysosomal membrane permeabilization and apoptosis

Widmann, Christian P-205

Caspase-3 protects stressed organs against cell death

Witko-Sarsat, Veronique P-206

Nuclear-to-cytoplasmic relocalization of the Proliferating Cell Nuclear Antigen (PCNA) during granulocytic differentiation depends on a chromosome region maintenance 1 (CRM1)-dependent export and is a prerequisite for PCNA anti-apoptotic activity in mature neutrophils

Wäster, Petra P-207

Ultraviolet exposure of melanoma cells induces Fibroblast Activation Protein- α in dermal fibroblasts facilitating melanoma invasion

Yang, Decheng P-208

p58IPK inhibits cell apoptosis through the PI3K/Akt pathway during transient coxsackievirus B3 infection

Yerbes-Cadenas, Rosario P-209

Control of FLIPL expression and TRAIL resistance by the extracellular signal-regulated kinase (ERK) 1/2 pathway in breast epithelial cells.
